

Decal Installation Instructions for AVERY Graphics “EZ” Films

December 2004

Installation Guide: Basic

Application type: DRY method

IMPORTANT: THIS IS NOT A WET APPLICATION

The material of your graphics is designed specifically to be installed dry. Any use of liquids will prevent the adhesive from adhering to the intended surface and will ultimately void the manufacturer's warranty. The material your decals are comprised of are a Pressure Sensitive High Performance Vinyl. This EZ Feature is a performance attribute and renders the application process easier to install for the applicator than most other types of vinyl.

Material Type: Avery Dennison™ films
MPI 1005 EZ or MPI 1007EZ Pressure Sensitive Vinyl with DOL 1000 Laminate

Application Tools

1. Squeegee
2. Low Friction Sleeve: Smooth cloth to wrap Squeegee, this prevents scratching of decal during application
3. Razor Knife: Exacto or similar (Sharp new blade)
4. Masking Tape: 1” or 2” width is appropriate
5. Tape Measure
6. Marking Pencil: Grease pencil if possible
7. Air Release Tool (Straight Pin)
8. Isopropyl Alcohol (IPA): Depending on surface condition you may need other solvents see: Cleaning and Preparation below.

SURFACE PREPARATION:

Proper cleaning and preparation of substrate prior to decal application is critical to the success of the decal. The following cleaning and surface preparation conditions must be followed immediately prior to application. Failure to adhere to these requirements can cause adhesion loss and therefore reduce the durability and performance level of the decal. The following conditions are relevant to properly prepared paint systems processed correctly per paint manufacturer specifications. NOTE: It is the responsibility of the end-user/applicator to ensure all painted substrates have been processed and cured per the paint manufacturer's requirements. Failure to follow paint manufacturer requirements can lead to decal failures and/or removal problems.

Cleaning and Preparation

Pre Cleaning Recommendations (before preparation)

The surface to which Avery Dennison™ films are applied must be completely clean, smooth, and dry before final preparation.

- Remove all dirt and grime with a commercial detergent solution and water.
- If grease, oil, wax, etc., are present, the substrate must be scrubbed with a solvent wipe isopropyl alcohol (IPA) and or other solvents if necessary ie: (Xylene, heptane, ethylacetate,).

Decal Installation Instructions for AVERY Graphics "EZ" Films

December 2004

CAUTION: Prior to cleaning with solvents, test the cleaning solvent on an inconspicuous area of the application surface to check for potential damage from solvent usage.

Final Surface Cleaning and Preparation

- After proper cleaning, the substrate surface should be thoroughly wiped by using a clean rag saturated with a cleaner such as IPA Isopropyl Alcohol or Windex.
- After thoroughly wiping with cleaner, dry wipe the surface completely using a clean, soft, lint-free cloth before solvent evaporates. NOTE: There must be no dirt, oil, grease or solvent residue remaining on the substrate prior to decal application.

"Squeaky Clean"

DECAL APPLICATION: SIZE *Under 8 Square Feet*

1. Ensure that the application surface is clean and dry before application of any graphic film.
2. Be sure the air, film and substrate are within the temperature range recommended for the film. The recommended application temperature for optimal performance and ease of use is 60-72 degrees Fahrenheit. The surface is not in direct sunlight, indoors in a well lighted, clean environment.
3. Experiment with what tool and technique works best before applying graphics. EZ series films are designed to work with a variety of tools and techniques. Whatever the tools or technique, it is important to use enough pressure to make sure the graphic firmly adheres to the substrate. **Note: *Pre masked graphics requires additional pressure.***
4. Overlap all strokes by about 50%
5. If a squeegee is used hold it at a 50-70 degree angle to the surface. The flatter the squeegee the better!
6. Locate where to position the graphics and mark the spot using either a grease pencil or a small piece of masking tape.
7. If the graphic is large, tape it into position securely with masking tape and use the masking tape hinge method.
8. If the graphics is less than 8 square feet remove the entire liner. Position the graphic on the marked points using light tacking pressure.
9. Squeegee the film using moderately firm overlapping strokes, making sure the applicator (squeegee) edge is flat with the substrate along the entire length of the stroke.
10. Remove air bubbles and tenting around rivets by using an air release tool(straight pin).

Final Squeegee Pass

1. Wait at least 10minutes after application to allow the adhesion to build to a functioning bond level.
2. Remove pre-mask.
3. Re-squeegee all graphic edges, overlaps and seams if any using firm pressure. Use a squeegee with the low friction sleeve to prevent scratching or damage to the decal.
4. **Re-squeegee is an absolute must on ALL edges of decal.**

Decal Installation Instructions for AVERY Graphics “EZ” Films December 2004

DECAL APPLICATION: SIZE [Over 8 Square Feet](#)

1. Application Temperature:
Minimum Surface/Ambient Air Application Temp. 45°F (7°C) Flat surfaces with / without rivets 50°F (10°C) for corrugated surfaces.
Maximum Application Temperature: 100°F (38°C)
2. Measure and position the decal, use masking tape to hold it in place. It is a good idea to mark the position of the panel in case the graphic comes loose (grease pencil or small piece of masking tape). Make sure the graphic is completely smooth and taut.
3. Determine the best starting point based on shape the vehicle and graphic elements to be applied. At this point, the liner can be removed to expose the adhesive in the desired starting area. (It is not necessary to remove the entire liner all at once, in fact it is usually better to remove it a little at a time as you squeegee.)
4. Hold the decal smooth and taut, away from the application surface with one hand and squeegee horizontally from the center towards the outer edges. Continue squeegeeing, using firm overlapping strokes from the center out, working away from the starting point.
5. Re-squeegee the entire decal using very firm squeegee pressure, including all edges. Puncture any air bubbles with a straight pin and re-squeegee from the edge of the bubble towards the puncture. (NOTE: Avery films with the “EZ” feature do not usually require making a hole to eliminate bubbles, just squeegee the bubble(s) or apply pressure with a finger or thumb.)

Note: The above instructions are specifically designed for the aforementioned Films/Materials specified above. These instructions are intended to be a guideline for preparation and installation. In the event you do not feel you possess the expertise or understanding necessary for this application please contact APE Wraps™ to help you locate a professional installer near your area.

Disclaimer: The techniques described here are intended as an overview of the vinyl manufacturer's suggested installation and removal methods. APE Wraps™ accepts **NO** responsibility for property damage, injury, or any other liability resulting from the use of these methods, or the installation of our decals on any surface.

WARRANTY: All statements, technical information and recommendations about APE Wraps™ products are based upon tests believed to be reliable but do not constitute a guarantee or warranty. All APE Wraps™ products are sold with the understanding that Purchaser has independently determined the suitability of such products for its purposes. APE Wraps™ products are warranted to be free from defects in material and workmanship for either one year (or the period stated on the specific product information literature in effect at time of delivery, if longer) from date of shipment if said product is properly stored and applied. It is expressly agreed and understood that APE Wraps™ sole obligation and Purchaser's exclusive remedy under this warranty, under any other warranty, express or implied, or otherwise, shall be limited to repair or replacement of defective product without charge at APE Wraps™ plant or at the location of product (at APE Wraps™ election), or in the event replacement or repairs is not commercially practical, to APE Wraps™ issuing Purchaser a credit reasonable in light of the defect in the product. APE Wraps™ liability for defective products shall not exceed the purchase price paid therefore by Purchaser and in no event shall APE Wraps™ be responsible for any incidental or consequential damages whether foreseeable or not, caused by defects in such product, whether such damage occurs or is discovered before or after replacement or credit, and whether or not such damage is caused by APE Wraps™ negligence.

NO EXPRESS WARRANTIES AND NO IMPLIED WARRANTIES, WHETHER OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR USE, OR OTHERWISE (EXCEPT AS TO TITLE), OTHER THAN THOSE EXPRESSLY SET FORTH ABOVE WHICH ARE MADE EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, SHALL APPLY TO PRODUCTS SOLD BY APE Wraps™. APE Wraps™ SPECIFICALLY DISCLAIMS AND EXCLUDES ALL OTHER SUCH WARRANTIES. NO WAIVER, ALTERATION, ADDITION OR MODIFICATION OF THE FOREGOING CONDITIONS SHALL BE VALID UNLESS MADE IN WRITING AND MANUALLY SIGNED BY AN OFFICER OF APE Wraps™.
